COURSE DESCRIPTION

A CCP is an experienced practitioner with advanced knowledge and technical expertise to apply the broad principles and best practices of Total Cost Management (TCM) in the planning, execution and management of any organizational project or program. CCPs also demonstrate the ability to research and communicate aspects of TCM principles and practices to all levels of project or program stakeholders, both internally and externally.

OBJECTIVES OF CERTIFICATION

1. To raise the professional standards and improve the practice of cost engineering by giving special recognition by their peers to those who, in fulfilling prescribed standards of performance and conduct, have demonstrated and maintained a high level of competence and ethical practices.
2. To identify for employers, clients, and the public, persons with broad knowledge of and capability to professionally apply the principles of cost engineering.
3. To establish a continuing program whose goal is the improvement of individual cost engineering skills and professional developments.
4. To clarify the body of knowledge and standards of conduct for the practice of cost engineering.

CCP Outline in brief

Cost Basics, Estimating, Planning, Scheduling, Project and Contract Management, Risk Management, Economic Analysis, Cost Control, Probability & Statistics, Technical Paper Writing etc.
