

AACE-AGS President visit to King Saud University, Riyadh

AACE-AGS President Mr. Ahmed Al-Mulhim visited and met with the Dean and Vice Deans the King Saudi University, Engineering Colleges, Riyadh on September 25, 2016. During the meeting he discussed about the AACEi-AGS plan to collaborate with the King Saud University (KSU), Riyadh. Accordingly KSU agreed to have an awareness program about the AACE International and its certifications. They are very eager to have the awareness program for the Certified Cost Technician and Certified Scheduling Technician certifications, as the graduate/master students are directly eligible for these certifications. They are also interested to have the CCT/CST training program for their university students soon.
